Wow, it's been ages since I heard this song! It sure brings back memories of yr 7 head banging in the back of Dad's car to this awesome Rasmus song. Shame they turned out a one hit wonder here in Australia.

This song was written by Lauri (lead singer) and explores most inner fears and worries of person. It is very catchy song that will have you singing it in no time. I would reccomend this song for fans of evanescence or muse.

You will find it is a very personal song, something everyone has experienced at some time. It comes from the heart, soul. It reaches out and tampers with one's own ghosts, fears and pushes one to thinking and wanting more out of life, a dare if you will!
